WORK EXPERIENCE

Fullstack Web Developer Work Learn

May 2023 – present

UBC Faculty of Forestry

Vancouver, BC

Skills: Python, Django, JavaScript, HTML, CSS

- Designed and implemented **student dashboard**, showcasing **application analytics** through **visual aids** for enhanced **data visualization** and **comprehension**.
- Implemented feature enabling students to **upload multiple training certificates**, providing **visibility to instructors** during application reviews.
- Revamped UI** of student and instructor views, ensuring **adherence to UI/UX principles** and delivering an **intuitive UI**.

Fullstack Web Developer Co-op

Sep 2022 – Apr 2023

BGC Engineering

Vancouver, BC

Skills: TypeScript, React.js, Redux, C#, .NET, and MS SQL Server

- Developed **data table** to **store** and **organize** instrumentation data, enhancing **data accessibility**.
- Implemented **modal dialogue** allowing users to **transfer data** from existing inspections into new inspections, saving time spent on **repetitive data entry**.
- Implemented **nested repeating sections** for landslide inspection forms, allowing users to **manage hazards** and **associated mitigations** efficiently.
- Implemented **tagging capabilities for attachments** for seamless **categorization** and **organization**.

TECHNICAL PROJECTS

PlayBook

Jul 2023 – Aug 2023

Skills: Express.js, Node.js, React.js, PostgreSQL, AWS - RDS, EC2

playbookmanager.xyz

- Created **optimized DB structure** considering weak entities, ISA relationships, and constraints, **minimizing data redundancy** through **BCNF normalization**.
- Enabled game scheduling, player and team management, sponsor integration, and attendee organization.
- Implemented **role-based admin and team manager views** with **controlled access**.
- Ensured user **data security** through **JWT web token-based authentication** and **authorization**.

Get-it-together

Jul 2023 – Aug 2023

Skills: Express.js, Node.js, React.js, MongoDB - NoSQL DB

get-it-together-wlk9.onrender.com

- Enabled logged-in users to perform Create, Read, Update, and Delete (**CRUD REST-API endpoints**) operations on tasks.
- Implemented **authentication** and **authorization** functionalities using **JWT tokens** and **bcrypt** for secure **password hashing**, ensuring user **data privacy**.
- Implemented **robust error handling** mechanisms to enhance **application stability** and **user experience**.

EDUCATION

University of British Columbia

Computer Science Major - Year 3

Vancouver, BC

Sep 2020 - Aug 2025

- CS+Math+Stat Avg: 85.5%
- Outstanding International Student Awardee

VOLUNTEER EXPERIENCE

Academic Experience Coordinator

Jul 2022 - present

- Collaborate with a team of coordinators to **enhance the academic experience** of UBC students.
- Organize **surveys and events** to guide them towards **appropriate resources** and **facilitate exploration of diverse opportunities**.

Software Team Member

Sep 2022 - Feb 2023

- Utilized **ROS QT** and **C++** to develop **GUI for rover**, displaying various **metrics**.

TECHNICAL SKILLS

Front-End: HTML, CSS, React.js, Redux, Axios

Back-End: Node.js, Express.js, .NET, Django

Database Management: SQL, PostgreSQL, SQLite, MS SQL Server, MongoDB (NoSQL)

Cloud: AWS - Lambda, API Gateway, Cognito, IAM, DynamoDB, RDS, EC2, WAF

Machine Learning: Python, Pandas, Numpy, Scikit-learn

Languages: JavaScript, TypeScript, Python, Java, C++, C, C#

Tools: Postman, pgAdmin, Git, GitHub, CI/CD, Docker, UML
